The companies that make up the group have established the following scope for their Management System Documentation, considering the organizational context, the requirements of interested parties, as well as the products and services offered:

- Commercialization, design, development, implementation, maintenance, and support of software applications.
- Provision of electronic voting solutions based on the Electronic Ballot System.
- Provision of services for the execution of electoral processes.
- Provision of provisional tallying (Turing) and internet voting solutions.

Organizational responsibility regarding data privacy.

In terms of information security and personal data privacy, the organization primarily acts as a Data Controller with respect to personal data it manages within the framework of its internal processes and relationships with clients, suppliers, and employees; and as a Data Processor when managing personal data on behalf of electoral bodies or other contracting entities, following the instructions of such controllers.

This Integrated Policy aims to:

- Comply with the requirements of Clients, Suppliers, and those related to information security and privacy, as well as applicable legal and regulatory requirements and any other requirements the organization deems necessary.
- Provide safe and healthy working conditions for people, reinforcing the prevention of work-related injuries and health deterioration.

- Preserve the confidentiality, integrity, privacy, and availability of information.
- Implement continuous improvement in all aspects of the Management System Documentation: Quality, Information Security and Privacy, Occupational Health and Safety, and Risk Management.
- Determine and take actions regarding the expectations of interested parties that may affect Client satisfaction.
- Establish an organizational culture based on trust and integrity.
- Foster commitment to the Management System Documentation throughout the organization.
- Inspire, encourage, and recognize people's contributions at all levels of the organization.
- Promote among all people in the organization the understanding of the importance of their individual contribution to the Management System Documentation and to compliance with applicable requirements.
- Promote risk management that may affect the results of the Management System Documentation across all processes and levels of Grupo MSA S.A., identifying, analyzing, evaluating, and addressing each risk that may harm the organization, considering them fundamental for improving the Management System as a continuous improvement mechanism.
- Take risk management into consideration when making strategic decisions.
- Protect the organization's critical information assets.
- Emphasize awareness and training of all personnel in Information Security, Privacy, and anti-bribery issues.
- Carry out activities with a focus on environmental protection and pollution prevention.
- Actively manage relationships with Clients, Suppliers, and other interested parties to achieve the sustained success of Grupo MSA S.A.

- Ensure the allocation of necessary resources to implement and maintain the Document Management System.
- Act ethically and implement responsible practices.
- Prevent, detect, and address any form of bribery and prohibit the offering, receiving, or solicitation of bribes, whether directly or indirectly.
- Provide secure and confidential channels to report potential bribery.
- Conduct due diligence assessments on transactions, business partners, and third parties.
- Identify specific roles within the organization responsible for implementing and maintaining the Anti-Bribery System.
- Establish a zero-tolerance policy towards bribery in all organizational activities.
- Comply with applicable environmental legislation.
- Prevent pollution and reduce the environmental impact of our activities.
- Use resources efficiently and properly manage waste, especially electronic waste.
- Promote continuous improvement and environmental awareness among all personnel.

To this end, Management is committed to communicating this Policy to all people within the organization, ensuring its understanding and application, making it available to all relevant interested parties, providing the necessary resources for its implementation and compliance, periodically updating it according to external and internal changes, and aligning it with the organization's strategic objectives and mission.
